Abstract

1 The abstract paragraph should be indented $\frac{1}{2}$ inch (3 picas) on both the left- and
2 right-hand margins. Use 10 point type, with a vertical spacing (leading) of 11 points.
3 The word **Abstract** must be centered, bold, and in point size 12. Two line spaces
4 precede the abstract. The abstract must be limited to one paragraph.

5 **1 Submission of papers to NeurIPS 2022 SyntheticData4ML Workshop**

6 Please read the instructions below carefully and follow them faithfully.

7 **1.1 Style**

8 Papers to be submitted to NeurIPS 2022 must be prepared according to the instructions presented
9 here. Papers may be **four to six** pages long, including figures. Additional pages *containing acknowl-*
10 *edgments, references, and appendices* are allowed. Papers that exceed the page limit will not be
11 reviewed, or in any other way considered for presentation at the workshop.

12 The margins in 2022 are the same as those in 2007, which allow for $\sim 15\%$ more words in the paper
13 compared to earlier years.

14 Authors are required to use the NeurIPS L^AT_EX style files obtainable at the NeurIPS website as
15 indicated below. Please make sure you use the current files and not previous versions. Tweaking the
16 style files may be grounds for rejection.

17 **1.2 Retrieval of style files**

18 The style files for NeurIPS and other conference information are available on the World Wide Web at

19 <http://www.neurips.cc/>

20 The file `neurips_2022.pdf` contains these instructions and illustrates the various formatting re-
21 quirements your NeurIPS paper must satisfy.

22 The only supported style file for NeurIPS 2022 is `neurips_2022.sty`, rewritten for L^AT_EX 2_ε.
23 **Previous style files for L^AT_EX 2.09, Microsoft Word, and RTF are no longer supported!**

24 The L^AT_EX style file contains three optional arguments: `final`, which creates a camera-ready copy,
25 `preprint`, which creates a preprint for submission to, e.g., arXiv, and `nonatbib`, which will not
26 load the `natbib` package for you in case of package clash.

27 **Preprint option** If you wish to post a preprint of your work online, e.g., on arXiv, using the
28 NeurIPS style, please use the `preprint` option. This will create a nonanonymized version of your

29 work with the text “Preprint. Work in progress.” in the footer. This version may be distributed as
30 you see fit. Please **do not** use the `final` option, which should **only** be used for papers accepted to
31 NeurIPS.

32 At submission time, please omit the `final` and `preprint` options. This will anonymize your
33 submission and add line numbers to aid review. Please do *not* refer to these line numbers in your
34 paper as they will be removed during generation of camera-ready copies.

35 The file `neurips_2022.tex` may be used as a “shell” for writing your paper. All you have to do is
36 replace the author, title, abstract, and text of the paper with your own.

37 The formatting instructions contained in these style files are summarized in Sections 2, 3, and 4
38 below.

39 **2 General formatting instructions**

40 The text must be confined within a rectangle 5.5 inches (33 picas) wide and 9 inches (54 picas) long.
41 The left margin is 1.5 inch (9 picas). Use 10 point type with a vertical spacing (leading) of 11 points.
42 Times New Roman is the preferred typeface throughout, and will be selected for you by default.
43 Paragraphs are separated by $\frac{1}{2}$ line space (5.5 points), with no indentation.

44 The paper title should be 17 point, initial caps/lower case, bold, centered between two horizontal
45 rules. The top rule should be 4 points thick and the bottom rule should be 1 point thick. Allow $\frac{1}{4}$ inch
46 space above and below the title to rules. All pages should start at 1 inch (6 picas) from the top of the
47 page.

48 For the final version, authors’ names are set in boldface, and each name is centered above the
49 corresponding address. The lead author’s name is to be listed first (left-most), and the co-authors’
50 names (if different address) are set to follow. If there is only one co-author, list both author and
51 co-author side by side.

52 Please pay special attention to the instructions in Section 4 regarding figures, tables, acknowledgments,
53 and references.

54 **3 Headings: first level**

55 All headings should be lower case (except for first word and proper nouns), flush left, and bold.

56 First-level headings should be in 12-point type.

57 **3.1 Headings: second level**

58 Second-level headings should be in 10-point type.

59 **3.1.1 Headings: third level**

60 Third-level headings should be in 10-point type.

61 **Paragraphs** There is also a `\paragraph` command available, which sets the heading in bold, flush
62 left, and inline with the text, with the heading followed by 1 em of space.

63 **4 Citations, figures, tables, references**

64 These instructions apply to everyone.

65 **4.1 Citations within the text**

66 The `natbib` package will be loaded for you by default. Citations may be author/year or numeric, as
67 long as you maintain internal consistency. As to the format of the references themselves, any style is
68 acceptable as long as it is used consistently.

Figure 1: Sample figure caption.

69 The documentation for natbib may be found at

70 <http://mirrors.ctan.org/macros/latex/contrib/natbib/natnotes.pdf>

71 Of note is the command `\citet`, which produces citations appropriate for use in inline text. For
72 example,

73 `\citet{hasselmo}` investigated\dots

74 produces

75 Hasselmo, et al. (1995) investigated...

76 If you wish to load the natbib package with options, you may add the following before loading the
77 neurips_2022 package:

78 `\PassOptionsToPackage{options}{natbib}`

79 If natbib clashes with another package you load, you can add the optional argument nonatbib
80 when loading the style file:

81 `\usepackage[nonatbib]{neurips_2022}`

82 As submission is double blind, refer to your own published work in the third person. That is, use “In
83 the previous work of Jones et al. [4],” not “In our previous work [4].” If you cite your other papers
84 that are not widely available (e.g., a journal paper under review), use anonymous author names in the
85 citation, e.g., an author of the form “A. Anonymous.”

86 4.2 Footnotes

87 Footnotes should be used sparingly. If you do require a footnote, indicate footnotes with a number¹
88 in the text. Place the footnotes at the bottom of the page on which they appear. Precede the footnote
89 with a horizontal rule of 2 inches (12 picas).

90 Note that footnotes are properly typeset *after* punctuation marks.²

91 4.3 Figures

92 All artwork must be neat, clean, and legible. Lines should be dark enough for purposes of reproduction.
93 The figure number and caption always appear after the figure. Place one line space before the figure
94 caption and one line space after the figure. The figure caption should be lower case (except for first
95 word and proper nouns); figures are numbered consecutively.

96 You may use color figures. However, it is best for the figure captions and the paper body to be legible
97 if the paper is printed in either black/white or in color.

¹Sample of the first footnote.

²As in this example.

Table 1: Sample table title

| Part | | |
|----------|-----------------|------------------------|
| Name | Description | Size (μm) |
| Dendrite | Input terminal | ~ 100 |
| Axon | Output terminal | ~ 10 |
| Soma | Cell body | up to 10^6 |

98 **4.4 Tables**

99 All tables must be centered, neat, clean and legible. The table number and title always appear before
100 the table. See Table 1.

101 Place one line space before the table title, one line space after the table title, and one line space after
102 the table. The table title must be lower case (except for first word and proper nouns); tables are
103 numbered consecutively.

104 Note that publication-quality tables *do not contain vertical rules*. We strongly suggest the use of the
105 `booktabs` package, which allows for typesetting high-quality, professional tables:

106 `https://www.ctan.org/pkg/booktabs`

107 This package was used to typeset Table 1.

108 **5 Final instructions**

109 Do not change any aspects of the formatting parameters in the style files. In particular, do not modify
110 the width or length of the rectangle the text should fit into, and do not change font sizes (except
111 perhaps in the **References** section; see below). Please note that pages should be numbered.

112 **6 Preparing PDF files**

113 Please prepare submission files with paper size “US Letter,” and not, for example, “A4.”

114 Fonts were the main cause of problems in the past years. Your PDF file must only contain Type 1 or
115 Embedded TrueType fonts. Here are a few instructions to achieve this.

- 116 • You should directly generate PDF files using `pdflatex`.
- 117 • You can check which fonts a PDF files uses. In Acrobat Reader, select the menu
118 Files>Document Properties>Fonts and select Show All Fonts. You can also use the program
119 `pdffonts` which comes with `xpdf` and is available out-of-the-box on most Linux machines.
- 120 • The IEEE has recommendations for generating PDF files whose fonts are also ac-
121 ceptable for NeurIPS. Please see [http://www.emfield.org/icuwb2010/downloads/](http://www.emfield.org/icuwb2010/downloads/IEEE-PDF-SpecV32.pdf)
122 `IEEE-PDF-SpecV32.pdf`
- 123 • `xfig` "patterned" shapes are implemented with bitmap fonts. Use "solid" shapes instead.
- 124 • The `\bbold` package almost always uses bitmap fonts. You should use the equivalent AMS
125 Fonts:

126 `\usepackage{amsfonts}`

127 followed by, e.g., `\mathbb{R}`, `\mathbb{N}`, or `\mathbb{C}` for \mathbb{R} , \mathbb{N} or \mathbb{C} . You can also
128 use the following workaround for reals, natural and complex:

129 `\newcommand{\RR}{I\!\!R} %real numbers`
130 `\newcommand{\Nat}{I\!\!N} %natural numbers`
131 `\newcommand{\CC}{I\!\!\!C} %complex numbers`

132 Note that `amsfonts` is automatically loaded by the `amssymb` package.

133 If your file contains type 3 fonts or non embedded TrueType fonts, we will ask you to fix it.

134 **6.1 Margins in L^AT_EX**

135 Most of the margin problems come from figures positioned by hand using `\special` or other
136 commands. We suggest using the command `\includegraphics` from the `graphicx` package.
137 Always specify the figure width as a multiple of the line width as in the example below:

```
138 \usepackage[pdftex]{graphicx} ...  
139 \includegraphics[width=0.8\linewidth]{myfile.pdf}
```

140 See Section 4.4 in the graphics bundle documentation ([http://mirrors.ctan.org/macros/](http://mirrors.ctan.org/macros/latex/required/graphics/grfguide.pdf)
141 [latex/required/graphics/grfguide.pdf](http://mirrors.ctan.org/macros/latex/required/graphics/grfguide.pdf))

142 A number of width problems arise when L^AT_EX cannot properly hyphenate a line. Please give LaTeX
143 hyphenation hints using the `\-` command when necessary.

144 **References**

145 References follow the acknowledgments. Use unnumbered first-level heading for the references. Any
146 choice of citation style is acceptable as long as you are consistent. It is permissible to reduce the font
147 size to `small` (9 point) when listing the references. Note that the Reference section does not count
148 towards the page limit.
